Reda Elnaggar

.NET Backend Developer | Computer Science Student

relnaggar11@gmail.com | Mansoura, Egypt

PROFESSIONAL SUMMARY

Computer Science student at Mansoura University with a strong interest in **.NET Backend Development**. Familiar with C#, object-oriented programming, SQL databases, RESTful APIs, and backend application development. Currently developing practical backend skills through the **Digital Egypt Pioneers Initiative (DEPI)** and hands-on projects.

EDUCATION

Faculty of Computers and Information – Mansoura University
Computer Science
Currently a Student

TECHNICAL SKILLS

Programming: C#, C++, Python

.NET: .NET, ASP.NET Core, Web API

Backend: RESTful APIs, CRUD Operations, Authentication & Authorization

Database: SQL, SQL Server, Entity Framework Core

Programming Concepts: OOP, Data Structures, Algorithms, SOLID Principles

Tools: Git, GitHub, Postman, Visual Studio

Web: HTML, CSS

TRAINING

Digital Egypt Pioneers Initiative (DEPI)
.NET Backend Development Training

- Developed backend applications using **C# and .NET**.
- Practiced building **RESTful Web APIs** using ASP.NET Core.
- Worked with **SQL Server** and database design.
- Used **Entity Framework Core** for database operations.
- Practiced Git and GitHub for version control.
- Tested APIs using Postman.
- Applied OOP and software development principles through practical projects.

PROJECTS

Library Management System — ASP.NET Core

- Developed a backend system for managing books and users.
- Implemented **CRUD operations** using ASP.NET Core Web API.
- Used **Entity Framework Core** with SQL Server.
- Tested API endpoints using Postman.

Student Management System — .NET

- Built a backend application for managing student records.

- Implemented operations for adding, updating, deleting, and retrieving students.
- Applied **C# OOP concepts** and database integration.

To-Do List REST API — ASP.NET Core

- Developed a RESTful API for managing tasks.
- Implemented CRUD operations using ASP.NET Core Web API.
- Connected the application to SQL Server using Entity Framework Core.
- Tested and validated API endpoints with Postman.

LANGUAGES

Arabic: Native

English: Very Good
